Quanika

Security systems integration
that's right for you

Quanika

Take advantage of the very latest integrated security software

Your security and safety challenges are complex – but the technology you use to manage them shouldn't be

Quanika Compact software was designed and developed to bring to life a single vision: to deliver on the true promise of integration.

Despite the hype around the possibilities of IP-based technology, many businesses still rely on siloed security systems that use proprietary protocols. This means increased risk due to limited control and visibility, operational inefficiencies and a limited ability to scale and adapt.

In short, integration is hampered by slow moving technology partnerships or expensive and complex customisation, which is out of reach of most organisations. **But not with Quanika.**

Unlock the value
of IP-integration

As never before, Quanika delivers on the promise of affordable integration. Whatever size your operation, Quanika Compact gives you the most capable, open architecture software solution available today.
It combines enterprise-level access control functionality with the power of Axis video surveillance, and gives you unlimited integration possibilities.

Quanika works with Axis devices and software that involves minimal PoE cabling, making deployment easy. And as your needs change, scaling and migrating to new systems is affordable and painless.

For small businesses, Quanika Compact improves efficiency and reduces risks. It lets them control events and alarms with visual verification; administer credential-driven access with ID for staff and contractors; automate and enhance their visitor experience; and respond to events more quickly – all with detailed activity audit trails and video evidence.

For mid-sized applications, Quanika can integrate both security and building management systems, driving efficiency across the entire facility. It's easy to create a centralised monitoring environment and that gives a complete view through video, intruder, fire and events from all devices and systems, map views, and more. The result: greater control and a faster response.

Readers and door stations

Users have a choice of RFID readers and intercom devices from multiple vendors that can combine high-quality audio, 24/7 video identification, remote entry control and smartphone integration.

Simplicity powered by IP

▶ Fast and affordable deployment

▶ A wide range of hardware options

▶ Intuitive and simple user interfaces

▶ Futureproof and scalable

Flexible, high-performance entry control

Quanika Compact leverages the power of the AXIS A1001 and A1601 Network Door Controllers that are easily mounted close to doors using power over ethernet (PoE) enabling, fast deployment and low maintenance costs. An efficient way to secure your facilities the controllers high-performance processing power and storage make them fast and stable, so you are absolutely sure that only people who have permission are allowed to enter your premises.

Advanced access management allowing storage of credentials directly on to the devices to enable flexible offline mode functionality ▶

Easy and Efficient Surveillance

Quanika integrates with AXIS Camera Station video management software, which is powerful and easy to use, allowing anyone to manage the system, handle incidents and quickly export high definition evidence. It includes easy video redaction tools for privacy compliance.

The AXIS Mobile app allows users to keep up with events remotely and the AXIS NVRs comes preloaded with software and preconfigured to reduce installation time.

▶ High performance image capture

▶ Simple, intuitive interface

▶ Remote notifications and alerts

And whatever camera you're looking for, you'll find an Axis network camera to suit your needs – from robust outdoor models to discreet devices for sensitive environments. The result is a plug-and-play solution that's perfect for installations of up to 128 cameras.
▶ **Unlimited entry controllers**

▶ **Unlimited users**

▶ **Up to 128 cameras**

▶ **Multiple administrators**

Mid-Sized Systems

With this option you can benefit from surveillance and control of your entire facility, from internal areas right out to the perimeter and even across multiple sites.

You can enhance your customer experience by automating visitor management and take advantage of big data intelligence from video analytics. Quanika will let you increase operational efficiency and reduce risk by adding ID badge software, controlling elevator access and integrating fire, heating and ventilation systems.

Access Control

Surveillance

Entry-Level Systems

Conventional integrated systems are best suited to large applications with hundreds of doors and cameras, yet the vast majority of installations are much smaller.

Quanika Compact recognises this. It allows you start with up to 20 doors with the option to integrate up to 16 cameras and gives you the flexibility to bolt on intercom and intruder systems - yet you only pay for what you need.

▶ **Up to 20 controllers**

▶ **Unlimited users**

▶ **16 cameras**

▶ **1 administrator**

Tomorrow's Security Solutions Today

Why Quanika

Working for major corporate enterprises globally, Quanika operates at the forefront of systems integration, developing the most capable, open architecture software solutions available today.

Whatever size your operation, whatever challenges you face, we'll strengthen your business with all the advanced capabilities you most need, seamlessly and affordably.

Quanika works with industry-best technology leaders to deliver high-level control, as never before.

We strip away the complexity and deliver on the promise of affordable integration.
